

WHITE MALE

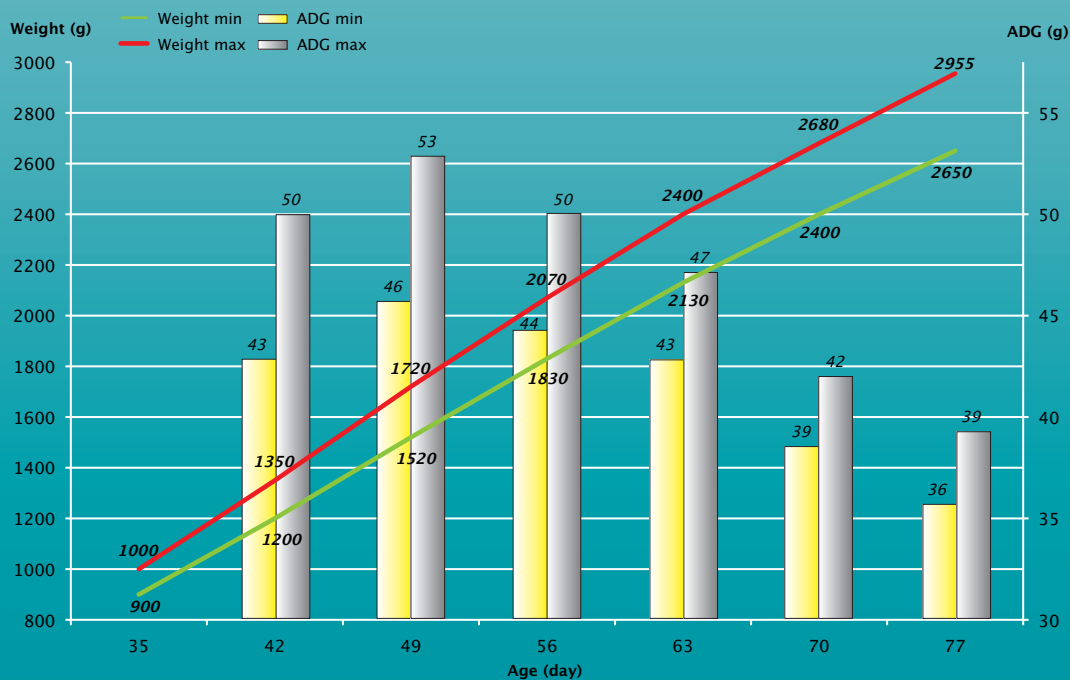

- **White or white with black extremities**
- **Adult weight : 7.000 kg – 7.500 kg**
- **Excellent conformation**

PERFORMANCES

- **Adapted to slaughter at different ages**
 - 2,350 kg - 2,400 kg at 65 days
 - 2,800 kg - 2,900 kg at 78 days
- **Average ADG greater than 45 grams**
- **Excellent feed conversion ratio in restricted feeding**
(target 35/70 days \leq 2.5)
- **Weight homogeneity at slaughtering**
- **Carcass yield : 57 – 60 %** (depending on slaughter age)

DESCENDANTS GROWTH CHART

These curves are given as an indication. Growth performances are directly dependents on season and breeding conditions (density, food range...).

**RESULTS
& SAFETY**

For a successful breeding!

COLOURED MALE

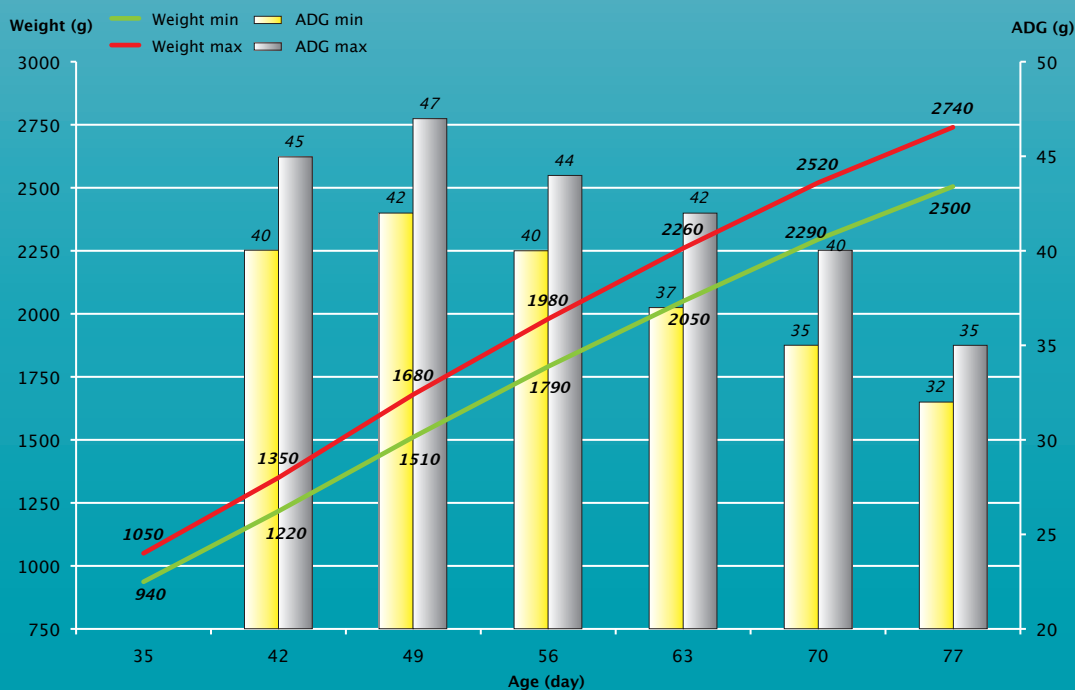

- Coloured or two-coloured
- Adult weight : 6.500 kg – 7.000 kg
- 100 % of descendants are coloured
- Less than 15 % of black rabbits

PERFORMANCES

- Used to produce a differentiated rabbit
- 2.400 kg – 2.500 kg at 70 days
- ADG from 42 to 45 grams
- Excellent feed conversion ratio (target 35/70 days \leq 2.5)
- Carcass yield : 59 – 60 %

DESCENDANTS GROWTH CHART

These curves are given as an indication. Growth performances are directly dependents on season and breeding conditions (density, food range...).
