

# TECHNICAL GUIDE

## PRODUCTION TARGETS

Fact No. 8.1

### Production targets

Production targets are included in the forms of presentation of male and female lines. These targets are given as an indication, they correspond to the results obtained in 2012 by the 10% best breeders using the genetic HYCOLE (21 breeders – 82 386 A.I.)

|                              | Target         |
|------------------------------|----------------|
| Birth rate                   | 87%            |
| Born alive / kindling        | 10.58          |
| Weaned / kindling            | 9.15           |
| Viability during fattening   | 97 %           |
| Average weight at 73 days    | 2.570 kg       |
| Productivity / A.I.          | 19.8 kg / I.A. |
| Renewal rate                 | 100 %          |
| Productivity / career female | 67 rabbits     |
